

Year 4 Geography - Autumn Term 1: Interconnected World

1. When giving a four-figure grid reference, give the two-digit eastings first followed by the two-digit northings.

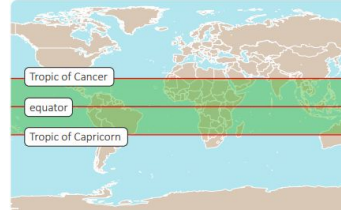

4. Significant physical features of the UK include mountains, rivers, islands, lakes and forests. Examples include the River Severn, River Thames, Ben Nevis and Snowdon

5. Human features can be interconnected by function, type and transport links.

Principle routes link major towns and cities across the country. Many principal routes terminate in London.

2. The Tropic of Cancer is 23 degrees north of the equator and Tropic of Capricorn is 23 degrees south of the equator.

How is the world connected?

3. The North American continent includes the countries of the USA, Canada and Mexico as well as the Central American countries. The South American continent includes the countries of Brazil, Argentina, Chile, Colombia, Peru, Venezuela, Uruguay, Ecuador, Bolivia and Paraguay.

6. Fieldwork techniques, such as sketch maps, data collection and digital technologies, can provide evidence to support and answer a geographical hypothesis.

Grid reference	Fieldwork	Physical features	Human features	Canal	National Rail
Tropics	Mountains	Rivers	Continent	Country	Climate
